“The important line between civil and criminal is being breached.” Alan M. Dershowitz /gatestoneinstitute.org (JAN 2023): “There are two major reasons why criminal liability has been extended to cover negligent behavior. The first is evidentiary: it is often difficult or impossible to prove a specific intent to commit a crime, so the law takes a shortcut, substituting negligence, which is far easier to prove. The second reason is to put the burden of preventing harms on the persons most able to do so. Another consequence [of this expanding criminalization of what used to be civil violations] ... is the weaponization of the criminal justice for partisan purposes... There are two fundamental mechanisms of justice for wrongs committed. The first is civil, in which the

wrong is compensated economically... second is criminal, in which the wrongdoer is punished – by imprisonment, probation or fine. Our Constitution recognizes this historic distinction by guaranteeing different rights in civil and criminal cases. The Bill of Rights provides that “in all criminal prosecutions” ... procedural protections must be accorded the defendant ... “speedy and public trial by an impartial jury” ... “the assistance of counsel” ...confront adverse witnesses ...prohibitions against compelled self-incrimination and double jeopardy ...and no “cruel and unusual punishment” ...In civil cases ...trial by jury and basic due process ...the line was blurred, especially between torts and crimes ...the ambit of the criminal law has expanded ... harmful conduct once deemed only a civil wrong ...began to be treated as criminal conduct, subject to imprisonment ...with regard to negligent acts that produce great harm ...involuntary manslaughter prosecution of Alec Baldwin ...shooting a prop gun that he was told had no live ammunition ...Kim Potter, a Minnesota police officer who intended to stop a fleeing felon by properly shooting him with her taser, but accidentally drew and fired her pistol... activists wanted to charge her with murder... Another current example of criminalizing negligent behavior is ...handling of classified material... criminal statute does require evidence that the person who possesses the documents “knowingly removed” them with the intent to “retain” them... doesn’t require proof of any intent to disclose or misuse them... politicization of decisions to subject citizens to criminal prosecution.”

significant constitutional defect – its lack of the procedural requirements required by Freedman v. Maryland ...arguing that the NSL’s gag provision is unconstitutional; it is not an independent claim for relief ...Section 2709 authorizes the government to prevent NSL recipients from disclosing that they have received an NSL or anything about their interaction with the government and Section 3511 imposes rules upon any challenge to that authority. Because the statute prevents recipients from speaking in the first instance rather than imposing a penalty after they have spoken, the gags are prior restraints ...A prior restraint is ‘the most serious and the least tolerable infringement on First Amendment rights ...any restraint imposed prior to judicial review must be limited to “a specified brief period” ... “the shortest fixed period compatible with sound judicial resolution” ...the burden of proof in court must be placed on the government ...And judicial review is notably lacking from NSL gag order scheme ...total failure of the statute to ensure a prompt judicial opinion ...Indeed, one of the Supreme Court’s explicit goals behind imposing the third Freedman factor was to counteract the self-censorship that occurs when would-be speakers are unwilling or unable to initiate judicial review themselves ...And where senior FBI or DOJ officials certify the need for the gag order, the court has even less discretion: a court is not permitted to evaluate the facts, but instead is required to blindly accept the FBI’s representations ...cases have taken years and are still without a final resolution ...The prior restraint doctrine requires speedy judicial review ...such requirement must come from Congress ...Section 2709 imposes a content-based restriction on speech while Section 3511 directs a court reviewing such a restriction to apply a standard review that is inconsistent with strict scrutiny ...But strict scrutiny is appropriate because the entire gag order scheme is a content-based restriction on speech ...the government must show that a restriction on free speech is “narrowly tailored to promote a compelling government interest” ...The statute does not distinguish – or allow the FBI to distinguish – between a prohibition on disclosing mere receipt of an NSL and disclosing the underlying contents ...when the FBI provides the required certification, recipients cannot publicly disclose the receipt of an NSL ...extremely deferential standard of review, and in some cases no substantive review at all. The statute allows the court to dissolve the agency’s gag order only if the court “finds that there is ‘no reason to believe’ that disclosure may endanger the national security of the United States, interfere with a criminal, counterterrorism, or counterintelligence investigation, interfere with diplomatic relations or endanger the life or physical safety of any person ... “such certification shall be treated as ‘conclusive’ unless the court finds that the Certification was made in bad faith ...NSL statute “impermissibly threatens the institutional integrity of the Judicial Branch” in violation of separation of powers ... “The fiat of a government official though senior in rank and doubtless honorable in the execution of official duties, cannot displace the judicial obligation to enforce constitutional requirements” ...The mere ‘possibility’ of harm occurring is insufficient to support a prior restraint on speech ...under strict scrutiny government “bears the risk of uncertainty” “cannot be subjected to regulation on the basis of undifferentiated fears of possible disturbances or embarrassment” ...”
